

COMPANY PROFILE

COMPANY PROFILE

The idea of establishing a Egyptian factory of premixes and disinfectants was based on a gap in local production.

After studies of the needs of the local market showed that there is a deficit in national production which is covered by imports by more than 50% of the national requirements of the premix which lead to increase the price of the products

So there is a need to cooperate with one of the largest manufacturers of premixes in Europe (Miavit Europe Company) to produce premixes and packed it locally to reduce the cost.

WE ARE CERTIFIED
